

ASSIGNMENT-1

To create a Portfolio using HTML and CSS

This portfolio consists of About Me, Skills and Interests, Projects and Contact Information which is done using the heading tags, div tags and internal css. This also includes flex layout and selectors and the list type which is unordered list.

CODE :

```
!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Rajitha-Portfolio</title>
  <style>
    h1{
      background-color: wheat;
      text-align:"center";
    }
    h3{
      background-color: black;
      text-align:"center";
    }
    .i1{
      font-style: italic;
    }
    #container {
      display: flex;
      width: auto;
```

```
height: auto;
}
#left-side {
flex: 1;
background-color: black;
padding: 50px;
color:white;
}
#right-side {
flex: 2;
background-color: black;
padding: 50px;
color:white;
}
#heading1 {
color: wheat; /* Set color for the first h2 tag */
}
#heading2 {
color:white;
}
#heading3{
margin-bottom: 10px;
text-align: left;
}
ul {
list-style-type: none;
padding: 0;
}

OUTPUT:

RAJITHA SAI-PORTFOLIO

Welcome to my Portfolio

About Me

Myself Rajitha Sai,Currently pursuing pre-final year at Velammal Institute Of Technology,Chennai,India. I'm a Computer Science student,my unique strength lies in bridging technical expertise with creative problem-solving. Passionate about leveraging technology for social impact, I actively seek projects addressing societal challenges. Beyond work, my love for literature adds a creative dimension to my approach in the dynamic world of technology.

SKILLS

Cloud Technologies
Python
Java
Data Analysis(Pandas,NumPy)

INTERESTS

Machine Learning
DBMS
Photography
Video editing

Projects

Blood Bank Prediction [Click](#)

This is an Statistical Analysis that predicts the necessary amount of blood in future which is developed using Python, this was sone by collaborating with NinjaHyperTeam.

Handwriting Recognition [Click](#)

Developed a Machine Learning project,that involves various frameworks in Python such as Django, Streamlit.
